About us

Broadgate is a front-runner in developing custom software and offering diverse services to valued clients across USA and India. We utilize futuristic technologies to build advanced enterprise applications which facilitate firms in effective process automation.
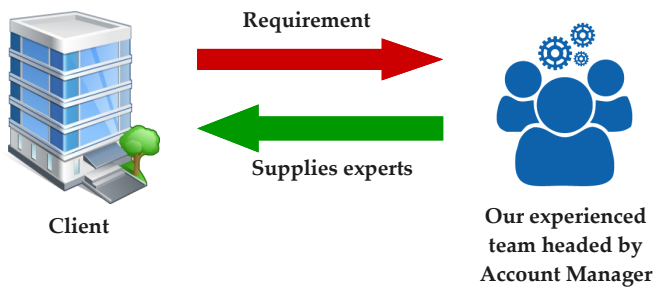

We strongly believe in the capabilities of next-gen programming languages and qualitative innovation, hence we pioneered in building enterprise applications to suit a thin client-tier environment. We design adaptable and secure frameworks and build robust applications with easy implementation to maximize performance.

Our domain expertise and market presence of over a decade make us the ideal firm to meet the specialized requirements of clients from various industries. The constant research and development efforts put in by our team add all round value to our solutions.
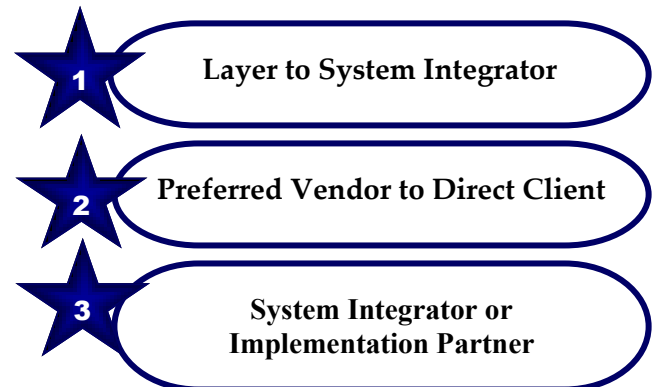

Broadgate aims for profitability and constant growth in order to set new benchmarks and provide value for the client's investment. We endeavour for the mutual success of Broadgate and its clients.
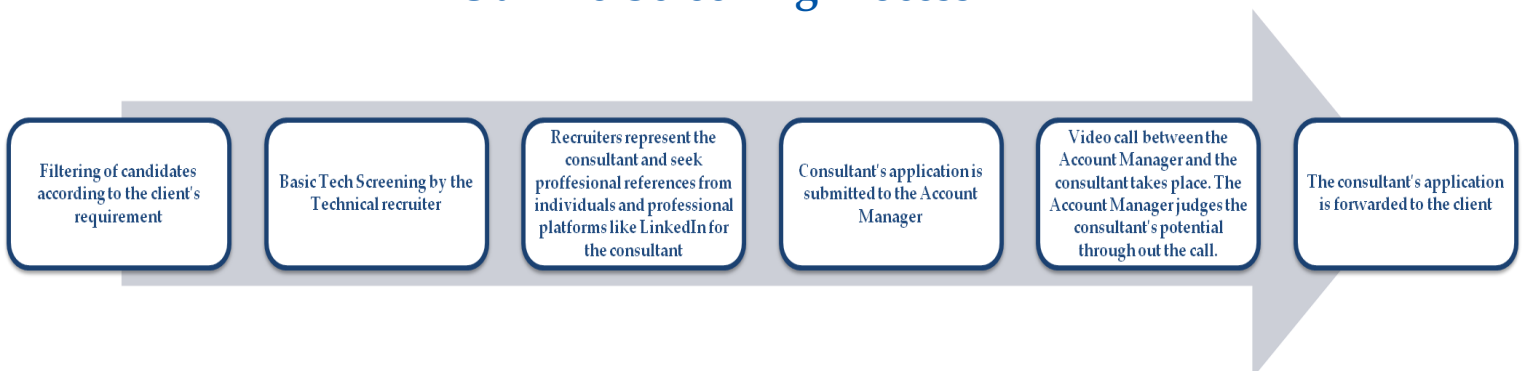

Our Staffing Process

Requirement

Supplies experts

Client

Our experienced team headed by Account Manager

Our Staffing Supplier Selection Criteria

1 **Layer to System Integrator**

2 **Preferred Vendor to Direct Client**

3 **System Integrator or Implementation Partner**

Our Pre-Screening Process

Filtering of candidates according to the client's requirement

Basic Tech Screening by the Technical recruiter

Recruiters represent the consultant and seek proffesional references from individuals and professional platforms like LinkedIn for the consultant

Consultant's application is submitted to the Account Manager

Video call between the Account Manager and the consultant takes place. The Account Manager judges the consultant's potential through out the call.

The consultant's application is forwarded to the client
